

1. A method of rolling a membrane sheet having a seam tape applied along one edge of said membrane sheeting comprising
folding a second edge of said membrane sheeting over upon itself to form a folded sheet wherein said second edge does not
5 overlie any area of said membrane sheeting having seam tape adhered thereto, and
rolling said membrane sheeting.

2. The method claimed in claim 1 wherein said seam tape is on a first surface of said membrane sheeting and said second edge of said membrane sheeting is folded onto said first surface.

3. The method claimed in claim 1 wherein said seam tape is on a first surface of said membrane sheeting and said second edge of said membrane is folded onto a second surface of said membrane sheeting.

4. The method claimed in claim 1 wherein said membrane sheeting is EPDM.

5. A roll of membrane sheeting having a first edge and a second edge, a seam tape adhered to said first edge wherein said second edge is folded toward said first edge and wherein said second edge does not overlie said seam tape.
